...

[Knowledge] only works if each person makes links as he or she browses, so writing, link creation, and browsing must be totally integrated. If someone discovers a relationship but doesn't make the link, he or she is wiser but the group is not.

Personal skills and experience are just the sort of thing which need hypertext flexibility. People can be linked to projects they have worked on, which in turn can be linked to...

Tim Berners-Lee. *Weaving the web. The original design and ultimate destiny of the World Wide Web*

Què veurem?

- 1. Com fer servir eines web per a fer xarxa acadèmica**
- 2. Com treure el màxim partit als primers estadis d'una recerca**
- 3. Un estudi de cas**

Què NO veurem?

- 1. Com fer recerca**
- 2. La fi dels mitjans tradicionals de difusió/publicació de la recerca**

Perquè... el problema és:

Introna, L. D. & Nissenbamum, H. (2000). “Shaping the Web: Why the Politics of Search Engines Matters”. *A The Information Society*, 16 (3), 169-185. Abingdon: Taylor & Francis

- **rebut: 17/07/1997**
- **acceptat: 24/11/1998**
- **publicat: juliol 2000 (aprox)**
- **1997: Larry Page & Page Rank**
- **1998: Larry Page + Segei Brin + \$\$\$ = Google**
- **2000: 100.000.000 cerques/mes, Google AdWords, Google Toolbar**

INTRO: WEB 2.0

Introducció: sobre Web 2.0

Què és

- La plataforma és el web. Estàndards. Web semàntica.
- El web de llegir i escriure. Arquitectura de la participació i efecte xarxa
- L'hegemonia de les dades (HTML → XHTML, pàgines dinàmiques)
- Llibertat de crear i compartir
- LAMP, feed (xml/atom/rss), blog, wiki, e-portfolio, open access, CC

Què implica

- El creador és l'editor: immediatesa vs. manca de filtrat
- Visibilitat en base a una meritocràcia popular, basada en continguts i tecnologia
- Converses, comunitats virtuals implícites. Comportament emergent.

Book: Human Rights In The Global Information Society [edit this](#)
by ismael peña — average reading time 0'52 minutes
filed under: [ict4d](#) | [cyberlaw](#), [governance](#), [rights](#)

The MIT Press has just published the book Human Rights in the Global Information Society, edited by Rikke Frank Jørgensen.

The table of contents really looks exciting, divided into three parts or chapters in three parts: the first one related to freedom of expression, access to information and privacy protection, where so hot questions such as censorship, data protection, the emerging media and others might be dealt with); second part about freedom of association and participation, where all the aspects of democracy and electronic democracy should be considered (the right to be informed, the right to deliberate, the right to make your own opinions up); and a third part about equity and development, where one would expect to find e-inclusion, interculturalism and leapfrogging.

While I have not read the book yet — so I don't know whether I'd found these words and/or the equivalent concepts — the feeling so far about the book is quite positive. And while it's usual to read about ICTs in the field of development concerning economic issues, sometimes even social issues, but rarely strictly in the field of Human Rights, the subject is getting the more and more important as some works and some institutions have already pointed.

Networked Readiness Index Vs. Human Development Index [edit this](#)

by ismael peña — average reading time 1'52 minutes
filed under: [ict4d](#) | [e-readiness](#) | [development](#)

The [World Economic Forum](#) has released the [Global Information Technology Report 2005-2006](#), being one of the more interesting outputs the **Networked Readiness Index (NRI)**. A pity – like most cases – you have to pay to get the full report.

In open access you can find:

- Some information on the Global Information Technology Report, mainly a table of contents, preface and executive summary.

I put in a table both the Networked Readiness Index (NRI) and the Human Development Index (HDI). In another table, same NRI against the Education Development Index (EDI). And plotted a couple of graphics shown below.

Digital Opportunity Index

<http://www.itu.int/osg/spu/statistics/DOI/index.phtml>

[T]he WSIS Plan of Action prioritizes evaluation and tracking of countries' progress in adopting ICTs.

The Digital Opportunity Index uses the core indicators as its starting basis, since they have been agreed by the international community as the most important indicators for measuring the digital divide. The Plan of Action also calls for the development of a composite index called the "ICT Development (Digital Opportunity) Index" to measure the magnitude of the digital divide and follow up the implementation of the Plan's objectives, goals and targets.

Developed by the International Telecommunication Union and other international and national organizations, the index is included in the World Information Society Report.

Wireless Networking in the Developing World

Vu sur [ICTlogy](#), le livre [Wireless Networking in the Developing World](#), sur les réseaux sans-fil dans les pays en développement.

Evidemment, ça me rappelle furieusement le thème de mon projet de [volontariat au Mali](#).
Feuilletant les chapitres, et je m'aperçois qu'un des auteurs n'est autre que le *program coordinator* de Geekcorps Mali à l'époque où je m'étais engagé.

Pas évident à lire en ligne, en raison du formatage type document traitement de texte, mais certainement bourré d'informations, vu que Ian était un grand spécialiste du sujet.

Technorati Tags: [geekcorps](#), [livre](#), [wireless](#)
