From teaching to learning

**Open
social
innovation**

The key is the process

Opening the process:
how are decisions made.

Foster the process:
based on what.

Replicate the process:
using what protocols.

Co-decision

The context matters:

transparency in the design.

Open inputs:

open... no, linked data.

Deliberation:

facilitate the infrastructures.

Radical subsidiarity

From leadership to facilitation:
who knows the needs better.

Granularity in decision-making:
info. filtering and talent location.

From participation to co-decision:
who is legit to decide.

Open social innovation Characteristics

- Decentralization
- Individualization.
- Casual participation

Open social innovation Policies

- Provide context.
- Facilitate the agora.
- Foster interaction.
