Empowerment and Governance in the Information Society (II): digerati, goverati and the role of ICT4D

By Ismael Peña-López

This is a two-part article on the power relationships and distribution in the Information Society. It first presents, in Empowerment and Governance in the Information Society (I): the hourglass of information power, some concepts as power, empowerment and governance, and how they have been distributed amongst citizens and institutions along ages. The second one, Empowerment and Governance in the Information Society (II): digerati, goverati and the role of ICT4D, reflects on how the quality of democracy is decreasing precisely because of an increase of citizen empowerment.

In Empowerment and Governance in the Information Society (I): the hourglass of information power we described a way to look at power, empowerment and governance, and ended up facing an odd distribution of power in the Information Society. A close up to that distribution may look like the following image:

![Distribution of power in the Information Society](image.jpg)

Analyzing digital literacy with a single simple tweet

By Ismael Peña-López
Main categories: Digital Literacy
[comments: 7]

Two years ago, in *Towards a comprehensive definition of digital skills*, I depicted digital literacy according to five different categories, being those categories technological literacy, informational literacy, media literacy, digital presence and e-awareness (please see the paper *From laptops to competences: bridging the digital divide in higher education* for a thorough explanation about those concepts):

![Towards a comprehensive definition of digital skills](image)

If you need to cite this article in a formal way (i.e. for bibliographical purposes) I dare suggest:

MONOGRAPH

Redefining the Digital Divide in Higher Education

Ismael Peña-López (coord.)
how to?  
e-science in your daily life
Who? Where? Once in daily life...
Pros
- Immediacy (real time)
- Transparency
- Attribution
- Tracking

Openness
- Long tail of subjects and disciplines
- Wisdom of crowds
- Personal Filtering & Folksonomies

Low Cost

Cons
- Rigour issues
- Not blind review
- Metrics / Citations

- Intellectual property rights
- Digital literacy
- Information overload
- Focus on non-formal
Ismael Peña-López
