e-Supervision

Enhancing the international debate

Ismael Peña-López

@ictlogist #EAIE2014

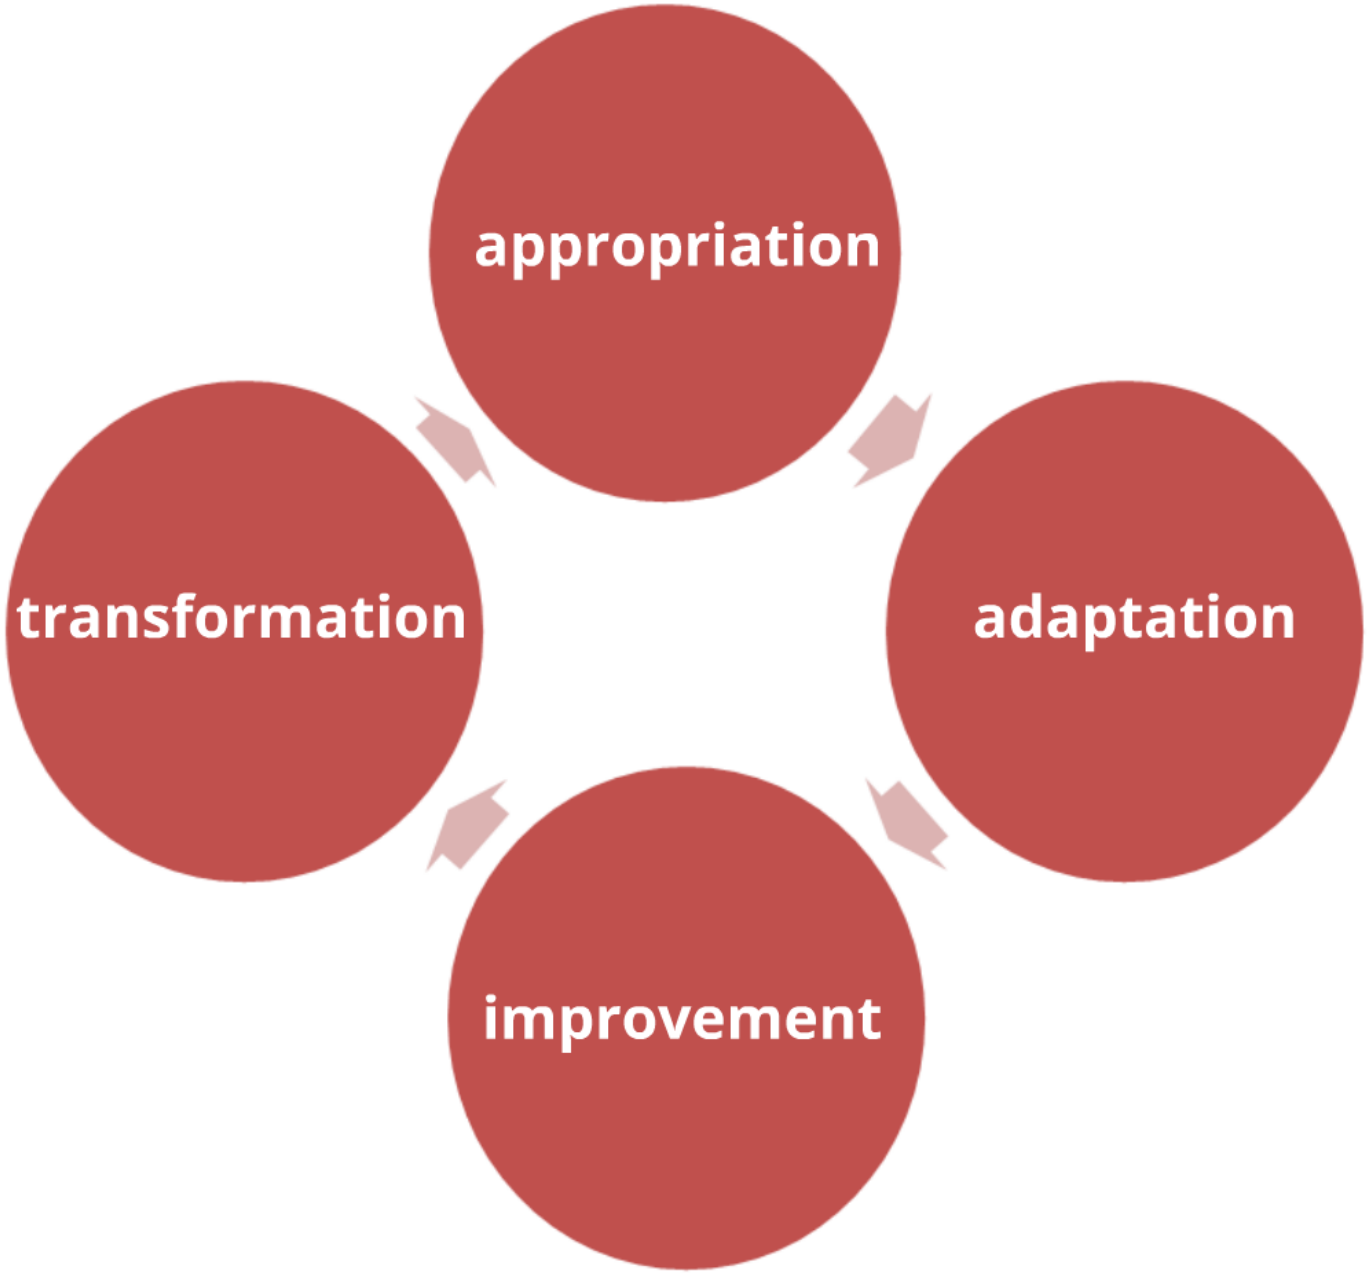
Prague, 18 September 2014.
Workshop at the EAIE Conference 2014

What is e-Supervision?

What is e-Supervision?

it depends on the "e-"

errrr Supervision
electronic Supervision
evolved Supervision
enhanced Supervision



appropriation
adaptation
improvement
transformation

errrr Supervision

Everyone is using ICTs,
but during the
supervision process.

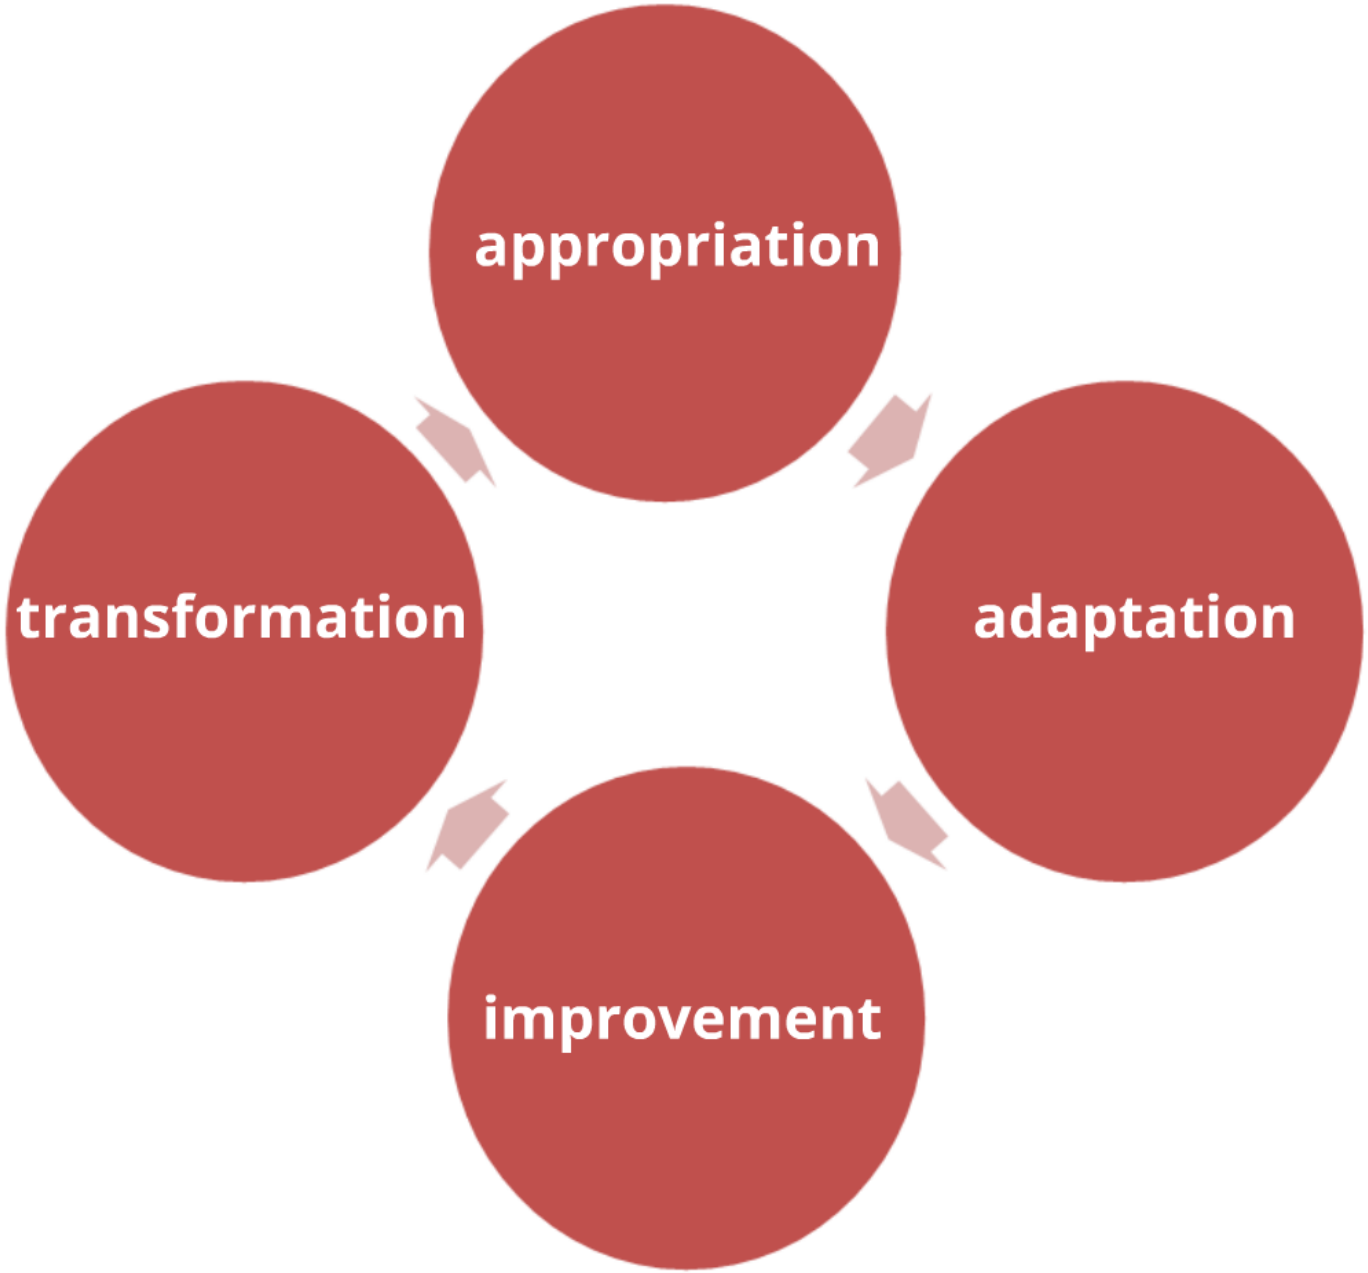
Everything remains the same.

errrr Supervision

A necessary step.

Master tools.
Develop skills.

Everyone works on their own.



appropriation
adaptation
improvement
transformation

electronic Supervision

Everyone is using ICTs,
to do basically the same.

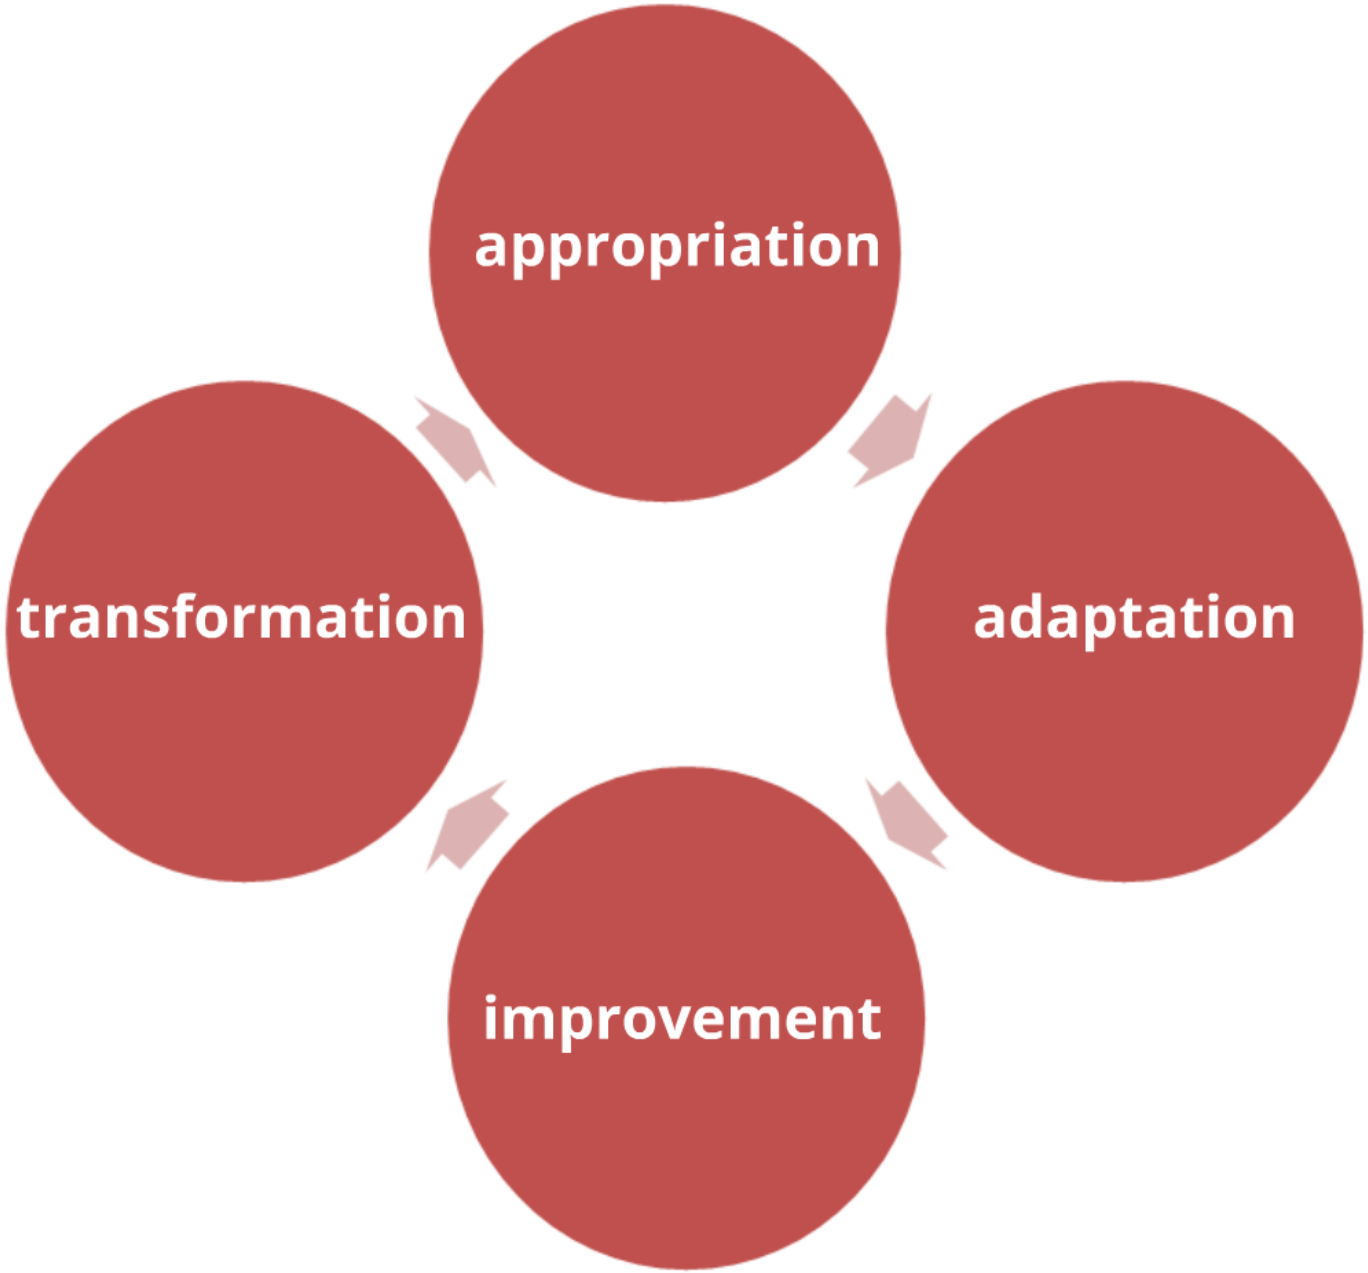
In essence,
a substitution of tools,
a digitization of processes.

electronic Supervision

A necessary step.

Costs may outweigh benefits.
Investments vs. expenditures.

Get over barriers of time+space.



appropriation
adaptation
improvement
transformation

evolved Supervision

Some processes are (positively) improved.

Processes are slightly changed to capture some benefits.

evolved Supervision

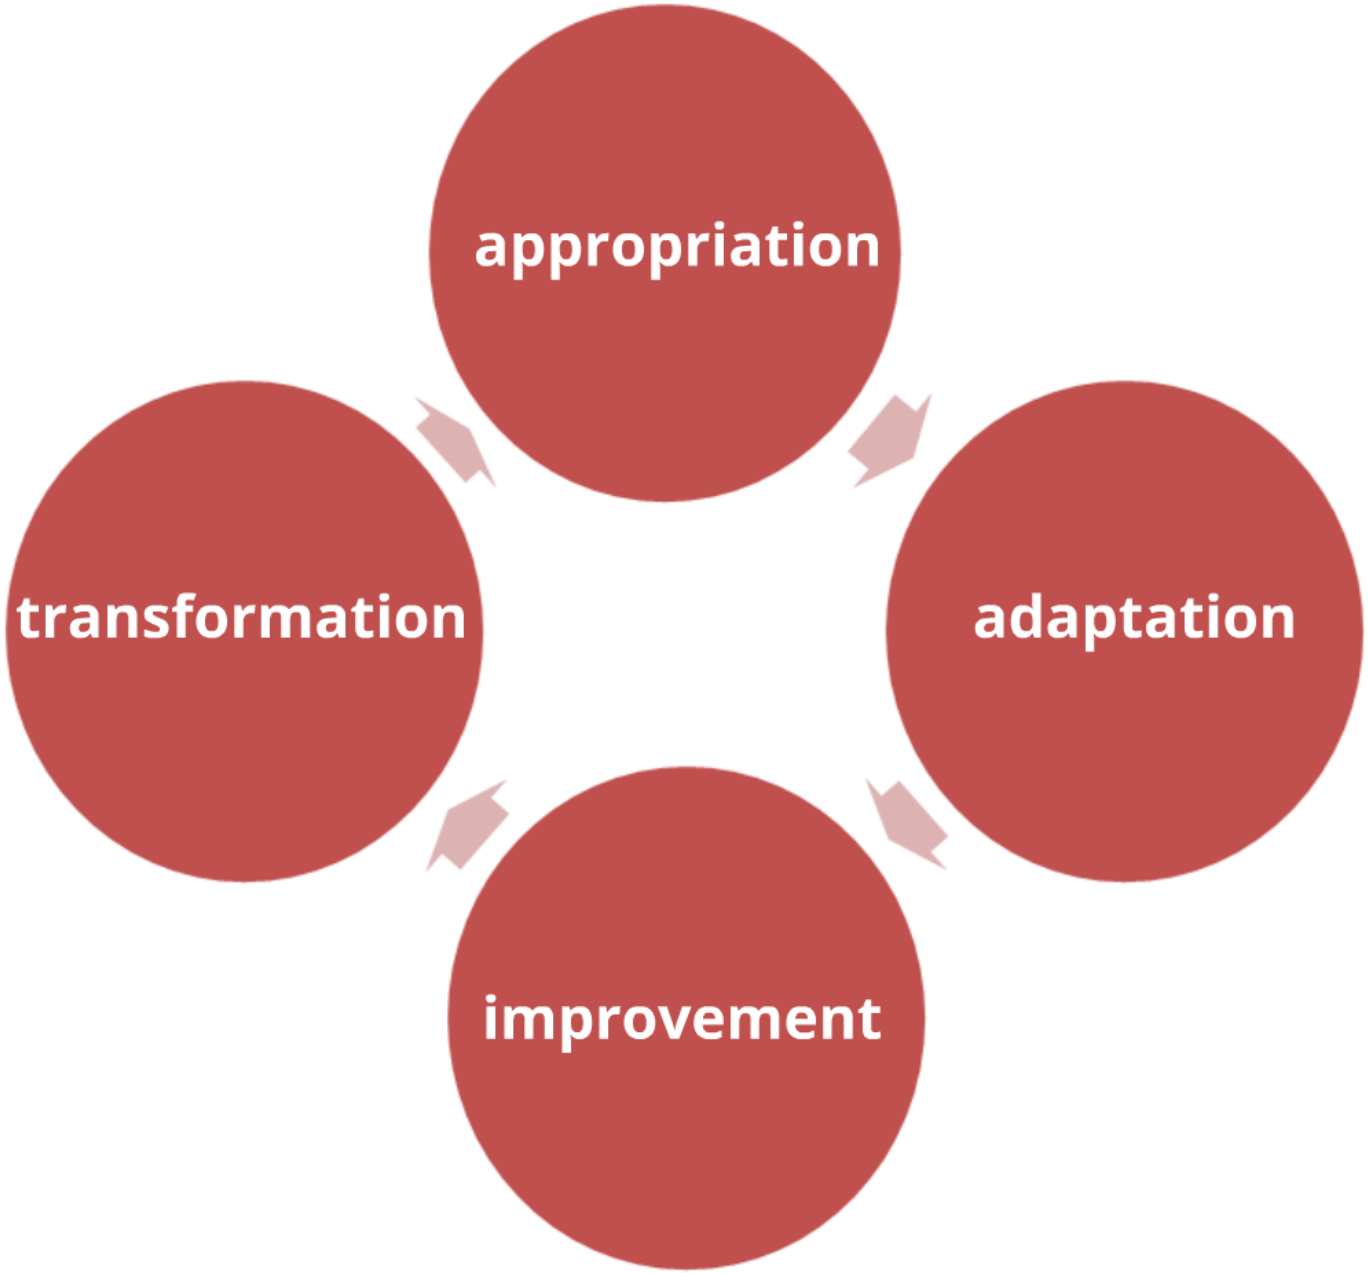
Communities work collaboratively.

New (international) actors:
- LMS, virtual classroom, xMOOC
- Communities of Learning
- Communities of Practice

evolved Supervision

An intermediate goal.

Benefits outweigh costs.
It's sustainable,
it's an improvement,
scales at the *meso* level.



appropriation
adaptation
improvement
transformation

enhanced Supervision

Processes are redesigned (almost) from scratch.

Everyone doubts whether this is supervision/research at all.
Lots of concerns, lots of fun.

enhanced Supervision

The process of production is challenged.

New (international) actors:
- Research 2.0.
- cMOOC.

enhanced Supervision

The process of assessment is challenged.

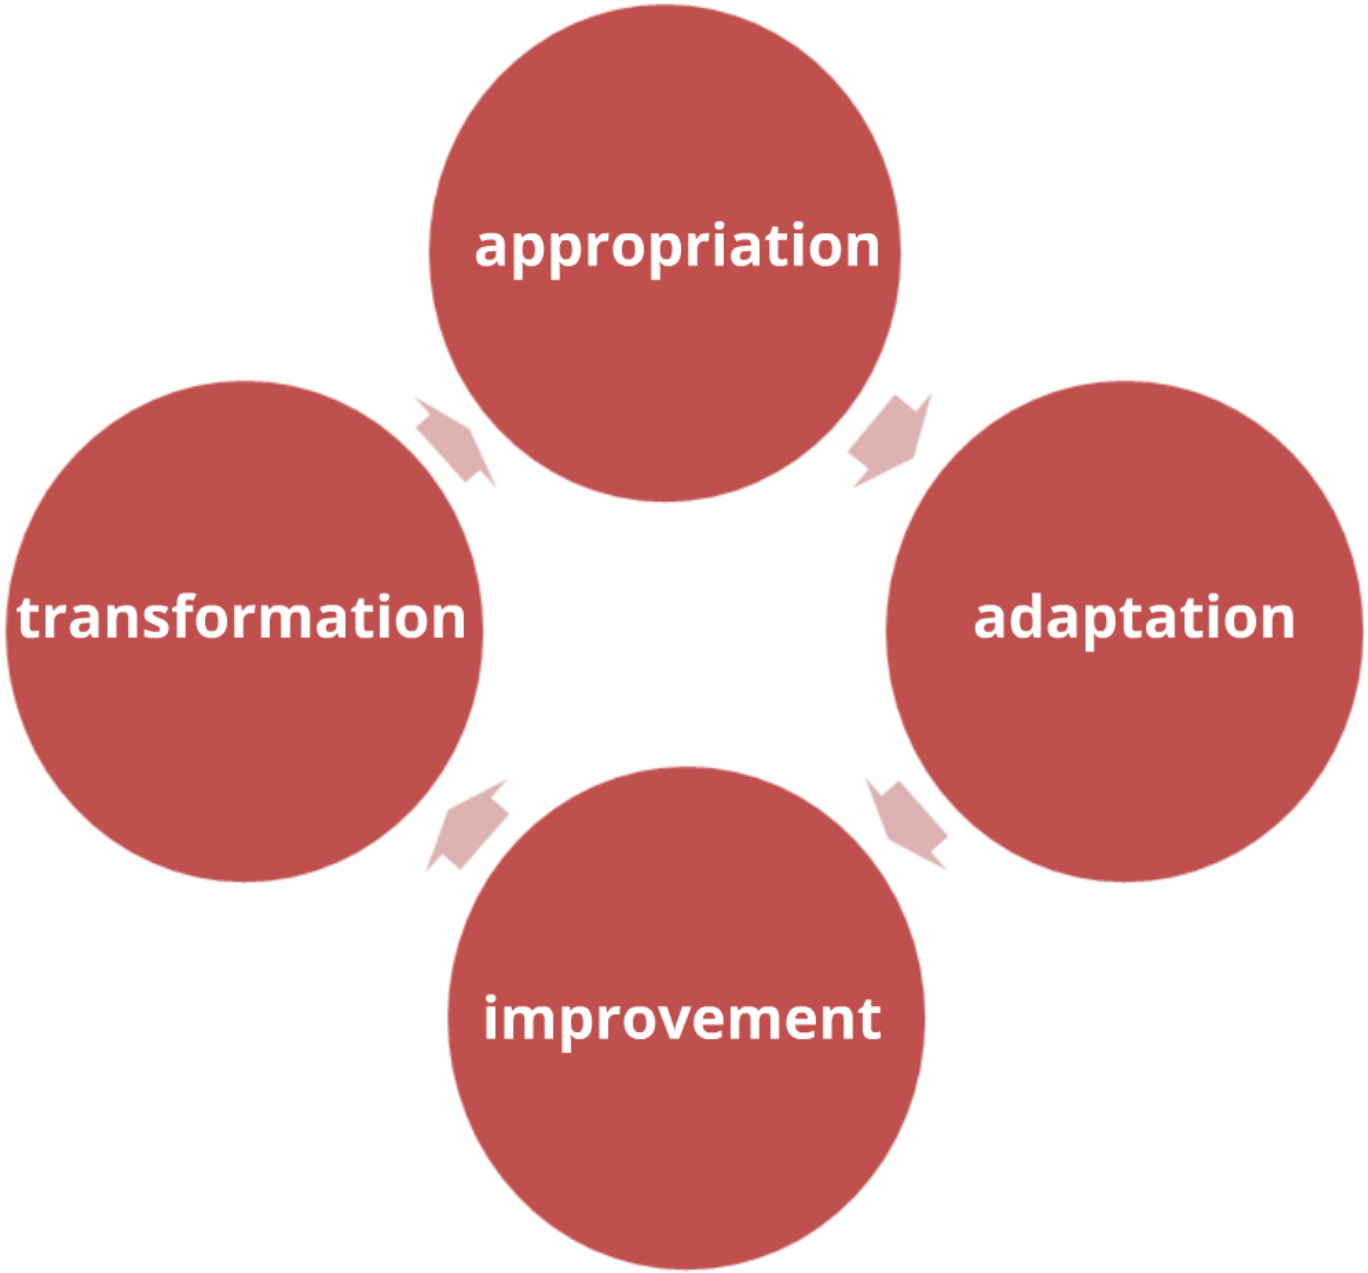
New (international) actors:
- Personal Learning Environment
- e-Portfolios
- P2P Supervision

enhanced Supervision

A goal to create a circular process.

Revolutionary... thus needs inside and contextual changes.

DOES scale, but needs reframing.



appropriation
adaptation
improvement
transformation
